Abstract (en)  
[origin: WO0023027A1] A patient support (1) which provides access to the spinal area of a patient. The support can be secured alongside a bed or operating table via link (18). The support includes a main limb (2) and a pivoted brace (4). The sternum support (23) includes a facial support (24) and a crossbar (22) to support the patient's arms.
