Abstract (en)

[origin: DE19856260C1] In reducing the polychlorinated dibenzodioxin and dibenzofuran (PCDD and PCDF) content of waste gas by adding adsorbent, separating the charged adsorbent and dust from the sintering process in a filter and recycling these to sintering, fines or dust separated in the filter are agglomerated with additive(s) before recycling. An Independent claim is also included for the sintering plant comprising a sintering belt, a waste gas pipe fitted with an adsorber, filter and recycling system, and a unit for agglomerating the separate solids with an additive.
