Abstract (en)

[origin: WO0136815A1] The invention relates to a starting system for an internal combustion engine, especially for use in motor vehicles. The inventive starter system comprises a starter motor, a countershaft transmission and a meshing system. According to the invention, the main components of the starting system (10) are configured as individual modules and can be variably combined to provide starting systems (10) with different parameters.
