Abstract (en)

[origin: EP1149701A1] The system is designed with a basic body, which has a multiple of color chambers arranged in it, a multiple of color or ink supply lines , which are connected across a respective inflow valve with respectively one of the color chambers , for the supplying of the color chambers with different color. Also a multiple of remote controlled outflow valves (3), which are connected with the color chambers, for the output of color-ink in the color-ink casing of the printing machine with measurable flow.
