Abstract (en)

An airtight container of flexible material particularly for granular or powder products, obtained by successive folding and welding of a sheet material, and having a substantially parallelepiped shape, with two reinforcing plates (7) disposed inside two opposite side walls (6) thereof, the container being provided with a dispensing device (10) on one of said side walls (6), said dispensing device comprising a flap (12) punched in said plate (7) that can be opened outward by pulling on a tab (15) of said sheet material of the container, which covers said flap (12). <IMAGE>
