Abstract (en)

There is provided a navigation apparatus (S) capable of executing a guide corresponding to an inside structure of a building which even if a vehicle is running in the building. The apparatus determines whether or not a current position of the vehicle is located in the building. If it is determined that the current position is located in the building, a plan view of the building is displayed. Then, the displayed plan view is used to carry out a navigation process. <IMAGE>
