Abstract (en)

[origin: FR2788971A1] The invention concerns novel cosmetic compositions comprising in a cosmetically acceptable medium an oil comprising at least an amine group and at least a urethane group and at least a conditioner selected among polyolefins, silicones, mineral oils, cationic or amphoteric polymers, cationic proteins, cationic protein hydrolysates, ceramide-type compounds and cationic surfactants. Said combination provides highly improved cosmetic properties (disentangling, softness) compared to properties obtained from one or the other of the constituents when used on its own. Said compositions are used for washing and/or conditioning keratinous materials such as the hair or the skin.
