Abstract (en)
[origin: DE19905215A1] The invention relates to a seat (1), notably for a motor vehicle, which comprises a seat area (2) and/or a backrest area (3). To create a seat (1) which has a simple structure and is economical to produce the invention provides for the seat area (2) and/or the backrest area (3) to present a rear bucket (4) and a front bucket (5) with a spring device (6), for said rear bucket (4) and front bucket (5) to be fixedly connected to each other such that they form a base part (7) and for a foam-like material, notably polyurethane foam, to be applied to at least part of the outer surface (8) of the base part (7).
