Abstract (en)

[origin: EP1151690A2] The hairdryer (1) has a casing and an electric cable (5). The dryer has axially opposite first (9) and second (10) support areas, which have holder elements (14,15). The holder elements allow the electric cable to be coiled in loops and supported on the support areas. Preferably, the first support area is formed on a protective cover at the handle part (2) of the dryer and the second support area is formed on the blower part (3) of the dryer.
