Abstract (en)

[origin: EP1151864A1] The cleaning system includes at least two supplies (8,9) separated from each other, which are provided for different cleaning fluids. Each supply (8,9) is connected across an own delivery line (11,12) with an own storage container (15,16). The supply lines (11,12) are blockable by valves (14), which are controllable by the printing machine control.
