Abstract (en)
[origin: EP1151903A2] The chair has a support frame (1) to which seats are fixed and a support rod (3), which has a clamp unit at its upper end for coupling to a support and conveying cable and rollers. The side ends of the chair have side walls (21) with a locking bar (5) and a cover hood (4) pivoting about horizontal bearing pins (11). The locking bar and the cover hood are pivoted closed against the force of a control spring (6). At least one of the side walls has a recess (22) to contain the control spring, which is connected on one side to the support frame and on the other side to the locking bar or the cover hood. An Independent claim is included for a
