Abstract (en)
[origin: EP1151935A2] A carton and a blank (10) for forming a carton for encircling one or more articles (A), for example bottles, comprising a plurality of panels including a first wall panel (14,16,18) and an adjacent second wall panel (20,22,24,26) for forming a tubular structure. The carton is provided with an article retention structure arranged in spaced, substantially parallel relationship with the first wall and further comprises one or more apertures (44,52) for receiving at least one of the articles (A). The spacer means (60,62) is provided to maintain spaced relationship between the first wall and the retention structure and anchor means is provided to substantially prevent lateral and/or transverse movement of the retention structure relative to the first wall. <IMAGE>
