Abstract (en)

[origin: EP1151954A1] The invention relates to a device for signaling the position of an elevator car (3) in the case of passenger evacuation comprising a measurement circuit (MC), which is connected to the landing door safety chain (SC) of the elevator installation. The measurement circuit (MC) is provided with at least a LED (25) that indicates to the rescuer person the presence of the elevator car (3) at a floor (E1, E2).
