Abstract (en)
[origin: WO0141721A1] The invention concerns novel cosmetic compositions comprising in a cosmetically acceptable medium at least a non-amine silicone and at least a type (AB)_n silicone, A being a polysiloxane block and B being a block comprising at least two quaternary ammonium groups. Said combination provides improved cosmetic properties (lightness, easy combing, volume, shine). Said compositions are used in particular for washing and/or conditioning keratinous materials such as hair or skin.
