Abstract (en)

[origin: DE19905935A1] The invention relates to a method for producing a coating of solvent-free adhesive systems on especially release-coated substrates. According to the inventive method, a fluid film is applied onto a rotating roller (3) using a fluid application device (2). The adhesive system (11) is applied onto said fluid film in one or more layers using an adhesive application device (1). The substrate (7) is contacted with the roller (6) so that the adhesive system (11) is transferred from the roller (3) to the substrate (7).
