Abstract (en)
[origin: US6360943B1] Hinge-lid boxes usually comprise a box part (10) and a lid (11) connected in an articulated manner thereto. In the region of a box front wall (15) and lid front wall (19), the box part (10) and lid (11) form transversely directed closure edges, namely a lid closure edge (33) and mating closure edge (34). These closure edges are of V-shaped design with different angles between the associated edge legs (37, 38 and 39, 40, respectively), with the result that a V-shaped or arrowhead-like opening (43) is formed.
