Abstract (en)

[origin: EP1154095A1] The snow trap has mouldboards (2) mounted parallel side by side on a support structure (1) and with upwardly angled longitudinal edges (3). An insert (6) is fixed on the support structure in the strip between the edges of adjoining boards and has a holder (9) for the snow trap (10) which extends above the strip across the roof incline. The insert has a longitudinal support (8) which is set level with the angled edges and protrudes at one end longitudinally beyond the insert.
