Abstract (en)
[origin: WO0050328A2] The invention relates to a system in construction time use of an elevator, said system comprising an elevator car, elevator ropes, a counterweight and a machine room deck with an elevator machine disposed on it. According to the invention, the elevator ropes have been fitted to run from the elevator car to a traction sheave connected to the elevator machine and further via a diverting pulley mounted on the counterweight to the machine room deck. The anchorage of the elevator rope is disposed substantially near the machine room deck and the elevator rope has been arranged to run further to a rope supply outside the hoistway.
