Abstract (en)

[origin: DE19908490A1] Non-irradiated fuel elements are accommodated in accident-proof transport containers (1) with double wall housings (3) during their transport from the production site to the site of use. The housing halves (9, 11) are interlinked by matching tongue-and-groove joints (33). Said transport containers are packed as a packaging (101) which is secured and cushioned by spacers (113), metal supports (107) and fastening elements (115).
