Abstract (en)
[origin: DE19962291A1] A modular selection key has a casing (6), spring-impact switch tappets (81), a toggle (10), a rotating button (11) or a key operator (2) as a turnable grip and one of several transmission links (4,4',5,5') for transferring motion from the grip1 onto the switch tappets via switch tilting elements (42,52). Stops fixed opposite the casing and movable counter-stops form different stop devices for selecting a number switch positions and operating modes.
