Abstract (en)

[origin: EP1155644A2] The card 1 includes front and rear layers 3, 4 and 2 which are creased, superimposed on each other and bonded together in selected regions 33-36. The front layer 3, 4 includes substantially discreet photoframe fronts 23-26 containing display apertures 31. The rear layer includes corresponding photoframe backs 5-8 which are mutually connected by strips 10-13, which are joined to the backs by lines of perforations 14. The perforations are inset from the corresponding edges of the photoframe fronts such that, when the strips are removed to separate the photoframes, the perforated edges of each photoframe back are inset behind the attached photoframe front. <IMAGE>
