Abstract (en)

[origin: EP1155788A2] The machine tool controller has a memory (1) associated with each of the tools used for the machine, storing data on the characteristics of each tool and of the setting up operations associated with the tool. A reader (2) extracts data from the memory and a menu is displayed (3) relating to the controller to deliver actuating signals (6,7,8) in response to menu inputs.
