Abstract (en)  
[origin: EP1155837A2] The printer has a plate cylinder (3) supporting first and second printing plates (20a,20b) which are clamped on the plate cylinder by a common clamping device (5) which is close to a contact pressure strip (4) which has a first segment for pressing and holding the first plate on the plate cylinder and a second segment for pressing and holding the second plate on the cylinder. The first segment is movable independently of the second segment. A registering pin associated with the first plate and a second pin associated with the second plate can be manually adjusted independently of each other
