Abstract (en)

A coating sheet for furniture panel (1), fit for providing this latter with defined decoration, includes a transparent plate (11) having a first face to be fixed to the panel (1) and a plurality of layers (12) specularly printed on said first face for reproducing the defined decoration. The transparent plate (11) keeps visible and protected the decoration. The decoration reproduces the shape and the size of the different portions of the panel (1) having grains oriented according to the real wooden panels. <IMAGE>
