Abstract (en)
A substantially planar canopy structure (2) supported on a plurality of uprights (4) mounted on a forecourt, having a framework assembly with upright receiving sockets mounted within the foundation for the reception of the supporting uprights. The planar canopy is formed from at least one prefabricated substantially rectangular canopy panel (3) comprising a pair of structural cantilever arms formed from rolled steel joist, external fascia plates forming a rectangular frame and mounted within fascia is in-fill cladding which comprises a plurality of cladding panels secured together forming a canopy soffit. <IMAGE>
