Abstract (en)

[origin: EP1156283A2] Heater for room heating, with an electrical heating element (11), placed in a generally plate formed housing (13) with a front panel (14) and a back plate (15) with fastening devices (12) for fastening to a wall or similar mounting surface. The heater includes a distance holder, in the form of an inlay (20) of fibre containing and/or porous, thermal resistant and electric insulating material, in plate or grid form. The inlay (20) is arranged towards the front panel (14) and fills most of the room towards the heating element (11). <IMAGE>
