Abstract (en)  
[origin: EP1156290A1] A shelf (24) of a refrigerator cabinet (10) extends over the width of the cabinet and is at its ends supported by the side walls (12 and 14, respectively) of the cabinet. The shelf has a first plane part (28, 30), which in sideways direction converts into a second plane part (30, 28) located in a plane forming an angle with the plane in which the first part is located, and is arranged so that it can be put in 4 different positions on each height level in the cabinet supported by the side walls, one (28, 30) of said parts in each one of these positions being located in a horizontal plane and the other (30, 28) of said parts sloping downwards in direction in to or out from the cabinet. <IMAGE>
