Abstract (en)

The object of the invention is an electrical contact particularly for an electrical connector for a baseless bulb, comprising a body (60) with means (54) for connection with an electrical cable (52), side walls (64, 66) from each of which is formed by bending a contact blade (68, 70), a lower wall (62) extending over all the length of said electrical contact, characterized in that the side walls (64, 66) and the bottom wall (62) form a half cage of open U shape. The invention also covers the connector adapted to receive such half cage contacts. <IMAGE>
