Abstract (en)
[origin: CA2351615A1] The process comprises preparing a plastic preform (42) by compression molding in a preform production station (28), blow molding the preform (42) into the configuration of a final container (48) in a blow molding station (44), and filling the blow molded container in a filling station (52), wherein the preform preparation, blow molding and filling are performed sequentially in physically proximate operations.
