Abstract (en)
[origin: EP1157630A1] The box has a front door (9,11) and internal holders (33,35) for accessories. The holders are formed so that each accessory is held in a storage and transport position, and moved out of that position by operating a release key (47) or by pivoting the accessory itself. A first holder has several inserts for under-thread bobbins (39), which are held by radial clamp forces. A second holder for sewing feet (51) is fitted into the box. All holders are located on a rack with side rails (31).
