Abstract (en)
[origin: CA2342010A1] A holder is disclosed for mounting a wiper mop to the end of a handle and f or clamping a number of relatively movable, absorbent strips (28, 29) of a textile material essentially transverse to the longitudinal axis of the handle. The holder has a head part and a plate for clamping the strips therebetween. In the strip clamping region, the holder has a base surface which has a larger length than width. The outer edges of the base surface are curved without a change in the direction of curvature to form a pair of corners (6, 7; 26, 27).
