Abstract (en)

[origin: EP1157794A2] The machine has a clamping/pressing unit, and a drive. The clamping unit (3) has two or more thrust pieces, which are charged independently of each other with a pressure force acting against the panel. The thrust pieces extend parallel to the timbers (2) forming the panels, and at right angles to the feed direction (8) of the panel. The thrust pieces have drives formed by piston-cylinder units (16b). The clamping unit has tubular heating elements (9), containing pref. a circuit of a flowing medium, pref. water, thermal oil, steam, etc.
