Abstract (en)
[origin: EP1157934A1] The container has two side walls (5,6), each with two or grooves (7,8). Each groove has an upper aperture (21,22) and a lower stop (10). Two or more slide journals (13) are formed on the outside of each side wall, and the relative distances between the journal in horizontal direction, are different from the distances between the upper apertures of the grooves. Each side wall has cut-outs in the upper edges, with their relative distances corresponding to those between the slide journals.
