Abstract (en)

[origin: EP1158248A2] The operating and/or display device has at least one component (2) fitted at the rear of an operating panel (4), which is provided with at least one opening (6) allowing operation of an operating element (8) provided by the component, or viewing of a display element provided by the component. The front side of the component has at least one fixing hook (10) fitting through the opening in the operating panel and engaging the opening edge (12), for securing the component at the rear of the operating panel in conjunction with at least one fixing device, e.g. a fixing screw (16) received in a threaded bore (14) in the component.
