Abstract (en)

[origin: WO0055007A1] The invention relates to a device for fixing a supplementary mat (Z) in an automobile, comprising a base part (1) and at least two pins (3) which can be fixed in the floor lining (B) of the automobile. Said pins (3) are arranged in the sheet-shaped base part (1) in such a way that they extend diagonally to the surface (13) of the base part (1) that faces towards the floor lining (B), the fixing device (2) being located on the surface (13') of the base part (1) that faces away from the floor lining (B).
