Abstract (en)
[origin: WO0054211A1] The invention relates to a data input device with integrated chip card reader, which on a console surface (10) situated at an angle to a support surface of the device presents an input field with keys (14). A receiving slot (16) for the chip card is positioned behind the input field, when looking towards said input field, and inclined in relation to the support surface of the device at an angle which is greater than the angle of inclination of the console surface (10). A weight (26) is arranged in the space remaining between the support surface and the receiving slot (16).
