Abstract (en)  
[origin: WO0052707A1] Holder for radioactive substances, comprising a first container, a second container and shielding means, wherein the first container is provided with first sealing means for liquid and gas tight closing said container, wherein the second container is provided with second sealing means for liquid and gas tight enclosing the first container within the second container, wherein the second container is at least mainly made of yielding essential unbreakable material, preferably plastic material, wherein the shielding means are positioned at least partly on the outside of the second container and are essentially impenetrable for radioactive radiation.
