Abstract (en)
[origin: EP1159898A2] The goods presentation unit, particularly of cardboard or similar, has a basic part (12) extending vertically with outer walls (16) articulately connected to one another. At least one of the connecting lines (18) between two outer walls at least partly deviates from the vertical. The basic part initially comprises a flat, one-piece formation and after pivoting of the outer walls to form a closed outer walling structure is held together by an adhesive or insert tab (20) between the two end-side outer walls coming in contact with each other.
