Abstract (en)

A servo chain drive conveys packing trays (4) filled with packing items in a cycle into a sealing unit to seal them there in a sealing device (11) with a covering foil (1). After being sealed, the completed packets (8) are fed in a cycle to a cutter unit and then passed on to be covered with foil rolled off a roller (17). A positioning device has first and second photocells (5,6) and a foil brake (7) between the photocells. An Independent claim is also included for apparatus for packaging.

Abstract (de)

Die vorliegende Erfindung betrifft ein Verfahren und eine Vorrichtung zur taktweisen Positionierung von Bildern über Verpackungsmulden (4), die auf eine Deckelfolie (1) gedruckt sind. <IMAGE>
