Abstract (en)

A reclosable opening device (4) for a pourable food product package (1) comprising a frame portion (5) defining a pouring opening (6) delimited by an edge (26) and a lid (8) hinged to the frame portion (5) and provided with a pair of projections (34) designed to contact respective protrusions (28) of the edge (26) of the frame portion (5) to keep the lid (8) open; the projections (34) of the lid (8) extend perpendicularly from the lid (8) and include a first portion (35) designed to be located between the respective protrusions (28) of the edge (26) and the hinge axis (A) in a closed position of the lid (8) and interfering with the first portion (28) of the edge (26) in an open position of the lid (8). <IMAGE>
