Abstract (en)
[origin: EP1160441A2] The suction pipe(2) is fastened directly to a frame(8) on the vehicle, and another element or assembly such as the driver's cab mounting or air filter mounting is built on, and for this purpose a corresponding holder(26) is provided. The engine side end(12) of the suction pipe has a radially downwards extending connecting plate(14) with two eyes(16) and which is connected to the side of the frame facing away from the engine. The eyes accommodate fastening screws which pass through the engine mounting and through-holes in the frame.
