Abstract (en)
The connection unit is a box (1) with input terminal (11) connected to a principal source of electric energy (SP), a terminal (12) connected to electronic devices in the vehicle through fuses (31-33), and another terminal (13) connected to an auxiliary source of electric energy (SA). A bistable switch (4) in contact with the terminals (11-13) of the box (1), allows selection of sources.
