Abstract (en)

[origin: WO0150917A1] The invention relates to guide fittings for pulling out drawers (1). The inventive fittings comprise a pull-out rail (5) on the side of the drawer and a support rail (3) on the side of the body on both sides of the drawer respectively. A central rail (6) is optionally arranged between the support rail (3) and the pull-out rail (5) in such a way that said central rail can be displaced. The pull-out rail (5) is inserted into a drawer frame and is fixed therein. A damper is provided which damps the pulling-in movement of the pull-out rail (5) before said rail reaches the final rear position. The damper (10) impinges a traveller (9) which is displaceably guided on the pull-out rail (5). The traveller (9) is provided with a stopper (8). The traveller, together with said stopper, comes to rest on the body rail (3) or the central rail (6) before the pull-out rail (5) reaches the final rear position thereof.
