Abstract (en)
[origin: US6595505B1] A work station with modular elements particularly simple to be handled and allowing the station to be transformed in response to the product to be assembled is provided. The work station (1) has a framework (3) consisting of an assembly of plates (5) and multidirectional joining components (6) assembled together to make up compartments (10). Several elements (4) are placed in these compartments, used as a work zone, a storage zone and/or a transfer zone. Elements (4) are held on framework (3) by removable pins (13) or screws permitting rapid mounting and removal. Elements (4) are interchangeable and can be set up as modules as according to the components handled, the apparatuses and accessories used, the product to be manufactured and the operator's morphology.
