Abstract (en)
[origin: DE19911882C1] The bridge is for use on the front door of a nose-in parked aircraft. A movable part of the bridge has its inner tunnel (1) pivoted to the fixed part (3, 8) and an outer tunnel (4), the height of which relative to the aircraft can be adjusted. There is a movable transverse tunnel (5) on the telescopic end facing the aircraft, to which a cabin (12) with a flexible folding roof (11) can be brought up.
