Abstract (en)
[origin: WO052915A2] The present invention relates to an arrangement related to a call procedure, wherein the receiver of a call shall be charged for the call and not the caller, especially in connection with users/endpoints that have been registered in a gatekeeper as subscribers to such service, for thereby allowing said gateway to set up H.323 calls therebetween, and for the purpose of presenting a simple way to call someone where the receiver is charged for the call, and without introducing any changes in the gate-keeper in question, it is according to the present suggested that for the purpose of also allowing callers who are not subscribers to such a service, to call free of charge numbers, the arrangement is provided with means for communicating with a proxy comprising adaption means to register the caller and make sure that the caller is connected to a free of charge call. Appropriately, said means for communicating with a proxy may be initiated by a click on a web page.
