Abstract (en)

An applicator (1), consists of a support (2) made from a first material and a holder (12) for the application elements (10), such as teeth or bristles, made from a second, less-rigid material and able to pivot relative to the support. The first material has a flexure modulus of 1000 or more, and the second less than 1000, and the two can be connected by over-mouldings or bi-injection.
