Abstract (en)  
The stall for displaying merchandise has a display surface which is mounted on a plate (16) and on which it can turn., its degree of rotation being limited by pegs on the plate which move in a curved slot in the surface. The plate is mounted on a pivot (17) on a base (2) and its inclination adjusted using a frame (21) with holes along its length which slides in a guide (24) and is locked in position by a pin (29).
