Abstract (en)
[origin: EP1162411A1] The method of the ventilation and heating comprises pressure chamber (1) with connection of pipes (6) or hoses (7) enabling incoming airs to carry the heat carrying fluid. A socket (8) connects a computer (9) and jack to a telephone (10). The venting air is fed by separate means to incoming air with water containing radiators having a big surface end and cross flow. An Independent claim is also included for a method at a combined ventilation and heating system.
