Abstract (en)
[origin: US6637035B1] The invention relates to a glove, especially a disposable glove. Said glove comprises at least two plastic films (6, 7) of substantially the same dimensions that are firmly linked with each other at least in the lateral marginal zones (8), thereby defining the inner (10) and the outer (9) face of the glove and leaving free a glove opening (11). Said glove is further characterized by an absorbing exterior layer (12) that is applied on the outer surface that pertains to the back of the hand and/or the inner surface that permits to the palm.
